

# Cell Division

## Questions covering the Cell Cycle

- | Across |  | Down |  |
|--------|--|------|--|
| 3      | Cell containing nucleus                | 1    | Go away during prophase  |
| 4      | Extend from centrioles                 | 2    | Nuclear Division   |
| 5      | Identical copies single chromosome     | 6    | Daughter cells created   |
| 7      | Condensed genetic material             | 8    | Longest stage  |
| 13     | Spindle fibers attach at this location | 9    | Protein/Dna Complex  |
| 14     | Pairs of chromosomes but not identical | 10   | During which stage do the chromosomes unwind?                          |
| 15     | Spindle fibers play tug of war         | 11   | During which stage do the chromosomes align in the middle of the cell? |
|        |  | 12   | Chromosomes appear   |
